Special Engineering

At Marstair we have been manufacturing air-conditioning and refrigeration equipment at our Brighouse factory for over 30 years. We pride ourselves at being experts in our field of engineering and have helped many customers with their specific cooling and heating requirements over the years.

Examples include:-

- Experience of various refrigerants including hydrocarbons and CO2.
- Designing and building special OEM equipment.
- Offering variations of our own standard products to suit customer requirements.
- Special Heat exchangers i.e. copper/copper for the harsh coastal environments.
- 60hz power options.

Marstair... ...manufactured in the UK

- Designed & manufactured in Brighouse, West Yorkshire
- Split systems controlling down to 10°C
- 80m pipe runs
- High sensible systems
- Ducted condensing units
- Lightweight cassettes with 1 piece removable chassis
- Wall mounted units with high level front discharge
- Cellarator systems down to 4°C
- ECA Approved R404a refrigeration condensing units
- New Eskimo R1270 refrigeration condensing units
- CD3 close control systems with humidity control

Marstair introduces NEW DXD Units

- New ducted evaporators based on our successful Quartz chilled water fan coils.
- Suitable for heat pump applications when used in conjunction with MHPUE DHPUE out door heat pumps.
- Available with all the options of the Quartz Sapphire range.
- AC or EC motors.
- Return Air Plenums.
- Low noise levels with class 'O' acoustic insulation.
- Various spigot sizes available.
- External resistances up to 100pa.
- EU2 filter as standard.

MHPUE and DHPUE outdoor heatpumps are available again.

- Heat pump condensing units perfect for bespoke heatpump applications.
- Defrost Logic self contained within the unit.
- 80m pipe runs.
- DHPUE ducted versions also available.
- Available with various expansion devices.
- HP and LP pressure switches.
- Low ambient start timer.
- 3 minute start delay.
- Fan speed control.
- Suction & liquid service valves.
